

COMPANION SHEET · DO NOT FOLD INTO THE BROCHURE

How to Print This Brochure

For the tri-fold file **protecting-family-land-trifold.pdf** — US Letter, landscape, double-sided.

SETTING 1

Print on Both Sides

Also shown as “Two-Sided” or “Duplex”.

SETTING 2

Flip on Short Edge

Also shown as “Short-edge binding”.

STEP BY STEP

- 1 Open **protecting-family-land-trifold.pdf** and choose **Print**.
- 2 Set paper to **Letter** and scaling to **Actual size** (100%, no “fit to page”). The file is already landscape.
- 3 Turn on **Print on Both Sides** (Two-Sided / Duplex).
- 4 Choose **Flip on Short Edge** (Short-edge binding) so the inside lines up with the outside.
- 5 If your dialog offers it, set margins to **None** and turn on **Background graphics** so the colors print fully.
- 6 Print **one test copy first**, fold it in thirds, and confirm the panels align before printing the full run.

YOU CAN OVERRIDE THESE SETTINGS

These are the recommended defaults. Printer dialogs differ, so the exact wording on your machine may vary — adjust any option to match your printer or your preference. If two-sided printing is unavailable, print single-sided and copy the second side by hand; if your printer feeds paper differently, long-edge may align better. When in doubt, a single test copy will show you what to change.

FOLD & READING ORDER

OUTSIDE (front of paper)

Fold the printed sheet into thirds along the two dashed lines. The narrower “**What Is Heirs’ Property?**” panel is the flap that folds in first.

Reading order: Front Cover → open the flap → What Is Heirs’ Property? → inside spread → Back (Where to get help).
